

Bins & Sackholders

BIN020/50/70

The Shuttleworth Soft Close Bin range, available in 20-litre, 50-litre and 70-litre models, is engineered to meet the stringent hygiene and durability standards required in healthcare waste management.

Each bin is constructed from robust mild steel and coated in a high-quality white epoxy finish that is resistant to damage and allows for easy decontamination in compliance with infection control protocols. The soft-close pedal lid mechanism reduces noise and limits airborne particle spread during use.

All models are equipped with rear castors for smooth relocation, and an ergonomically positioned pedal system that allows hands-free operation to minimise cross-contamination. The bins are compatible with a full range of lid colour options to facilitate waste stream segregation in accordance with NHS HTM 07-01 guidelines, making them suitable for general, medical, anatomical, cytotoxic and offensive waste disposal. Built to withstand continuous daily use, these bins deliver a long service life and consistent performance.

Code	Description	Dimensions	Weight
BIN020+LID COLOUR CODE	20 Litre Bin	27.5 x 34 x 50cm	9kg
BIN050+LID COLOUR CODE	50 Litre Bin	39.5 x 41 x 58.5cm	11kg

Bins & Sackholders

BINSH020/50/90

The Shuttleworth Sack-Holder Bins offer a practical, hands-free solution for healthcare waste management. Designed with corrosion-resistant materials and a smooth, easy-to-clean finish, these free-standing bins operate via soft-close foot pedals to minimize noise and maintain a hygienic environment. Each unit comes fully assembled with an elasticated cord and finger loop for secure bag placement, ensuring fast setup and reliable use.

Available in 20L, 70L, and 90L capacities, the bins are engineered to match different clinical demands, compact models suit consultation rooms, mid-size units work well in treatment areas, and larger bins serve high-traffic zones efficiently.

Offered with HTM 07-01-compliant colour-coded lids, the range supports correct segregation of clinical waste in accordance with infection control standards.

Code	Description	Dimensions	Height With Lid Up
