

# Chart Board Trolleys

## CBT001/02/03

The Shuttleworth Chart Board Trolley range is built to support efficient patient documentation and secure record management across a variety of clinical environments. Manufactured from high-quality mild steel and finished in a durable epoxy coating, the trolleys are designed for long-term use and withstand the rigorous cleaning regimes required in modern healthcare. The hinged chart board provides a reliable writing surface while also protecting stored files underneath, making it ideal for ward rounds, patient reviews, and routine clinical documentation.

Each model includes a secure lockable storage drawer to maintain confidentiality of patient charts and notes, with additional shelving to house essential items close at hand. Mobility is ensured through a robust castor system, with 100 mm swivel castors that allow smooth and quiet movement across corridors and clinical areas, two of which are fitted with brakes to guarantee safe positioning when stationary.

The design combines practical storage capacity with ease of manoeuvrability, reducing staff workload and helping to maintain workflow efficiency during busy shifts.

Code	Width	Depth	Height
CBT001	70cm	50cm	144.8cm
CBT002	70cm	50cm	99.6cm
CBT003	53cm	43.2cm	123.8cm
